

Septic · the even-operator line

$$u^{(6)} + u^{(4)} + \cdots - 720u^7 = 0$$

$$(n, p) = (7, 6) \cdot q = 1$$

Grey cusp: $\Delta = 0$
Pale region: $\Delta > 0$
Diamonds: real degeneration parameters

Even operators also carry characters of order two. This branch is separate from the full-order character family.
Every point determines the compatible lower coefficients; each such equation has one meromorphic wave.
Lattice of the full twisted period group Γ · Real invariants do not alone imply a bounded real profile.
